NCR Voyix SCO HW Fabric Card Only and Full Function

The next generation of self checkout hardware provides retailers with the most innovative and personalized experiences. This extensible and configurable piece of hardware will compliment each individual retailer's storefront while increasing shopper throughput and shopper satisfaction.

Compliment your brand's image

The contemporary personalization of the NCR Voyix Next Generation Self Checkout will compliment virtually any retail environment and branding

With its sleek, compact design, the NCR Voyix SCO HW Fabric expands the visibility between your attendants and shoppers, giving attendants a clear line of sight to monitor all self-checkout lanes. It also provides extra branding opportunities with accent lighting, animated displays, and swappable panels.

Configure your entire storefront

Quickly convert your self-checkout lanes from card to cash, or from self-checkout to an assisted lane independently and conveniently.

With the Next generation of self-checkout, retailers can configure their hardware fabric to their stores in a unique way to provide them with the best experience. Retailers no longer have to take up valuable time configuring/changing out different hardware. They can now swap out different pieces of the fabric on their own time, in an easy and scalable way.

Enhanced Self-Checkout Capabilities

Extend the capabilities at your self-checkout with dynamic lane sizing, display upgrades, RFID and vision.

The new hardware fabric is compatible with multi-sensor checkout such as RFID, palm payments, and computer vision. Your employees can implement these opportunities on the self-checkout, all while not disrupting the store experience.

Card Only

Self Checkout Hardware Fabric

Technical specifications

Status Light

- Shopper navigation
- Staff prioritization
- Ad revenue stream

Processor

- Coffee Lake Intel Core i3 or i5 options

Memory and Storage

- 8GB+ RAM / 120GB SSD

Intuitive user interface

- Integrated audio
- Co-located cash inputs/outputs
- "follow-me" indicator lighting
- uNav keypad for increased usability

Integrated Peripheral Options

- 7199 NCR POS receipt printer
- Coupon Bin

Pre-loaded operating systems

- Windows 10 IoT 2019 LTSC 64bit

POS Configuration

- CX7 15" P-Cap Display
- Upgradeable to 18"+ (Portrait or Landscape)

Customizable design

- Custom color swappable on site
- Standalone CTM or coin and cash modules separate option
- Standard color (Black / Gray)
- 1, 2 or 3 bagging platforms
- LED Accent lights
